

# SOLDER PASTE MIXER

## MIX500D SLOPE

Before mixing

After mixing

### APPLICATION

MIX500D Slope efficiently and evenly mixes the solder paste to a liquid state. It helps to achieve better results of stencil printing and reflowing processes. The use of the mixer also reduces the chances of absorbing air moisture as it is no longer necessary to remove the lid of the solder paste jar before the paste is actually used in production.

**TOPOINT TECHNOLOGY LIMITED**

### FEATURE

- 3 safety design: The lock, proximity switch and the electromagnet valve can assure the safety for the physic body.
- The only maintenance work the user needs to do is cleaning; and it works steadily with low noise.
- With LED, indicators and buzzer for warning, it is easy to operate.

### SPECIFICATION

- Power: AC220V , 50Hz/AC ;110V 60Hz , 60 W
- Rotating speed:  
Primary Rotating:1000 RPM  
Secondary Rotating : 380RPM
- With the adapter: 500g\* 2cans, 1Kg\* 2cans
- Time setting: 0.1~9.9Mins  
10 ~ 30Mins
- Dimension: 420\*420\*427mm(W\*D\*H)
- Weight: 35Kg

### HIGHLIGHT

Jar housing selection guide

	Solder craem Cantainer diameter
L	φ 53-60mm
M	φ 60-67mm
S	φ 67-84mm

The composition of solder paste in the can will be evener and it will be easier to handle the can if the can is tilted.
